

Name:CBFG6600 explosion-proof floodlights**CXS****Description:**

To meet the requirement of railroad, electric power, police, oil field, mine and so on values working or accident amend. Our company has developed CBFG6600 big power explosion-proof working light(Xenon lamp), which has certificated by CHINAAUTHORITY and could safety use in various explosion area and underwater sites.

Functions:

1. Safety & explosion-proof: with topmost explosion-proof level in flameproof type; it can be used in any potentially explosive atmospheres safely.
2. High efficiency & energy-saving: by adopting special saving bulb with high color temperature, the luminous is 3200lm,5 times than the same power if halogen bulbs. The lightness is 5 times than 100w halogen bulbs. The bulb life could be 10000h, 5-10 times than common halogen bulbs, the continuously work time is no less than 11 hours. The goods under same indication, the using power is 15% of the common halogen bulbs, with small hot power and more security.
3. Reliability: the high-energy battery has no memory and high specific capacity, after one charging, it could have 90%capacity in one year and 65% in two years and with low voltage lighting protection to sure the battery the battery will not over release.
4. Stable quality, have full seal design, the shell of searchlight made of special alloy with high hardness can resist strong impact.
5. Flexibility: lighting handle can be changed 120 handle up and down, with convenience working wheel and handle line, simple to operate.
